

Text Editor

21.11.2022

Thanki Ashish

Enrolment: 22SOECE13039

Roll No: 13

Division: E

Branch: Computer Engineering

Definition

Create a Text Editor With Basic Functionalities.

Functionalities

1. Create File
2. Edit File
3. Open File
4. Save File

Program

```

test.txt - 8 lines  
HELP: Ctrl-Q = quit
```

1/8

The image shows a code editor window with three tabs: 'main.c', 'Shell', and 'file_name.txt'. The 'file_name.txt' tab is active and displays the following text:

```
1 new file
2 raw input mode is enabled
3 -> you can use enter, backspace and shortcut keys
4 -> also can save as file type
5 -> displays if file is modified
6 -> shows lines written in file
7 -> shows file name if saved otherwise no name
8
```
